Subject: GW Pathway Evaluation Meeting
Date: 07/25/2006 10:05 AM

Just a quick note on what I would like to accomplish at tomorrow's meeting:

Discuss and reach agreement on new sites for evaluation this year.

Identify any "obvious" data gaps at sites that were sampled last fall. Note: these would be data gaps such as we missed the plume or the methodology was not successful at certain locations and would **not** require a detailed evaluation; the detailed evaluation would be part of the Round 2 report and the data gaps filled in 2007.

Discuss and reach agreement on the risk evaluation considering our comments on the PRG TM, the recently approved HHRA EPC and Exposure factor TM and the ERA LOE table.

Provide a preview of the report to facilitate agency review.

Build some momentum for us to get the report submitted and reviewed and develop the sampling plans for a fall 2006 sampling effort.

If we are not prepared to meet the above objectives, we should cancel the meeting. Otherwise, I feel we should have it.

Eric
